LED PX3 Device

Quick User Guide

Product Name	LED PX3 Device
Catalog #	AT8003-D
Outside Dimensions	7 inch x 5 1⁄2 inch x 6 1/4 inch (L x W x H) 18 cm x 14 cm x 16 cm (L x W x H)
Device Operation	1. **Power-On:** The screen activates automatically upon powering on the device and enters time-setting mode by default. A session duration must be configured before the light can be activated. 2. **Light Control:** Press the button once to turn the light on. Press again to pause. Press and hold for more than 2 seconds to reset the timer to the currently configured duration. There is an automatic safety switch that turns off the UV when the device is opened. 3. **Function Selector (Gear-Shaped Button):** Press to cycle between three display modes: Time Setting, Light Intensity, and UV Testing. Use the **+** and **−** buttons to adjust the selected parameter – time adjusts in 5-minute increments, intensity in 5% increments, and UV units between uW/cm^2 and mW/cm^2. **Note:** UV output measurement requires the optional UV sensor accessory, available for purchase separately. Without the accessory connected, the UV Testing screen will not display a value. 4. **Cooling Fan:** The fan activates automatically when the light turns on and continues to run for 10 seconds after the light turns off.
